

# accomodation cabins

A complete modular cabin constitutes a combination of a living area with a sanitary cabin. Its design is meant to enable an easy installation on ships, platforms and others maritime facilities. The modular cabin is provided with complete electrical, water and ventilation systems adjusted to an immediate connection in their location.

The modular cabin conforms to strict conditions of the usage and safety regulations applicable on sea units and provides a maximum comfort during the everyday usage.

Modular cabins is produced as a complete, single module. It contains:

- Wall panels with mounting profiles
- Ceiling panels with mounting profiles
- Wet units
- Entrance doors
- Revision doors
- Set of furniture
